FALL OF X

Few knew that the mutant nation of Krakoa was founded in large part due to Moira MacTaggart, whose secret mutant power of resurrection allowed her to live out multiple lifetimes and timelines, using the knowledge she accumulated to help Professor X and Magneto to establish the fledgling nation. When the truth came out, Mystique depowered and attempted to kill Moira to preserve the timeline, but Moira was able to flee only to realize her fleeting mortality in a terminal cancer diagnosis. In a bid to stay alive, Moira uploaded her mind into a machine body, turning completely against Krakoa and mutantkind, who she feels betrayed her.

Mister Sinister, upon learning of Moira's power, made an "engine" of Moira clones, using the Moira clones as save points that allow him to explore his plans over and over again. What he himself did not realize was that he was one of four clones made by the original Nathaniel Essex, who programmed Sinister and the three other clones to pursue means of ascending to being a godlike Dominion outside of space and time. Upon each of the four's attempts, Essex has harvested their success and claimed it as his own...and has ascended, himself, to Dominion status.

Now, in a last-ditch effort to stop the Dominion from ever forming in the first place, Xavier has enlisted the help of the newly elected X-Men members who were recently killed at the Hellfire Gala. The fate of mutantkind rests in their hands.

Right there with

Aw, come
on now. I'm a

Any longer and we

The Hellfire

I'm not as immortal
as I used to think I
was. Don't want to
test my limits
again.

And we
don't need to.
Dazzler.

With everything Rachel
unlocked in my mind,
I'm getting faster and
faster at detecting
any signs of her.

Even if I am
feeling every
bit of the effort
too.

All we need is
one version of Moira
who's not cybernetic and I
can lift the information we
need to get Xavier where
he needs to go--Moira's
own mental map of
her past.

Well, let's
all take a moment
to catch our breath.
But not much longer
than that.

Xavier
entrusted me
with assembling the
right team for this
mission. I had, oh, a few
thousand mutants
to choose
from...

...and I
picked the five
of you.

Xavier has
a plan to talk to
Moira in her tenth life
before her powers
manifested, but we
need the exact date,
time, and location
that happened.

He can't
trust anything
Moira told him
before her
betrayal.

Prodigy's
our best bet at
getting to the
truth.

So no
pressure, but
the fate of all
existence over
is on our
shoulders.

We won't
let ya down,
coach. Send
us back in.

Appreciate
the enthusiasm,
son.

I hate to
say it, but we're
running out of Moira
engine pathways.
Sinister only made
so many of those
monstrosities.

If
you don't
find what we're
searching for
on the next

//NO-PLACE TRANSCRIPT: XAVIER, CHARLES & SUMMERS, RACHEL,
IMPRINTED AFTER THE RESURRECTION OF THE DEAD X-MEN//

CHARLES XAVIER: You're sure these are the mutants you want for the mission Rachel?

RACHEL SUMMERS: You told me the squad was my decision. Are you second-guessing me before their eggs have cooled?

CHARLES XAVIER: I just expected.

RACHEL SUMMERS: A psychic ninja or tactically trained Canadian who'll do anything for the cause?

CHARLES XAVIER: I must speak with Moira before she manifests her powers. Given that she's come to tell about her future to us, that what she told me about her past is true. Obtaining the information directly from Moira's mind is crucial. Enigma can be anywhere. We travel into the past once. He'll be ready the next time. It has to be exactly right on the first attempt. We get one shot. I just want to be certain you know what you're doing.

RACHEL SUMMERS: If there's even an intact biological Moira mind left in any of Sinister's clone-long no time sees... and that's a big if... the window between Sinister making those dupes and the real Moira going full ghost in the machine was brief. We'd better hope the right butterfly beat us to the gate at the right time.

CHARLES XAVIER: I had suspected you'd ask Elizabeth to lead the mission.

RACHEL SUMMERS: I'm not flinging my girlfriend into uncharted dead-end realities. Betsy can stay relatively safe and sound back in Britain. Besides, Moira will have defenses against a direct psychic approach. She certainly got enough experience hiding her thoughts from you. Prodigy is mission-critical; his psychic absorption is passive. She may not be prepared for it.

CHARLES XAVIER: And you believe the others are capable of safeguarding the boy? We have no idea what may have developed in Essex's branching timelines. We witnessed just one firsthand and are still dealing with the fallout.

RACHEL SUMMERS: Sending an off-the-charts powerhouse is too risky. The Dominion could sense aberrant power signatures and figure out our play. Dazzler, Cubes, Frenzy, and Sam... they're experienced, they're committed and besides...

CHARLES XAVIER: Besides what?

RACHEL SUMMERS: They're the X-Men.

"WEAPON M" COMPONENTS:

☒ CARBONADIUM COIL

-Harvested from Omega Red, who somehow survived the end of the world. Lost a few body parts myself takin' him down. Got this fixed right to my spine now, make sure the weapon never leaves my side. Hurt like anything.

☒ ADAMANTIUM-COATED FEMUR

-Collected from one of Wolverine's corpses. Sure left enough of those around. Provides a sturdy base—finally, Logan's good for something.

☒ SHEN XORN'S SEVERED HEAD

-Thought I'd never get this pried off the weird old monk, but without it, I'd have no way to generate a black hole and reach past lives. Pretty sure his brother's still out there lookin' for me. Good luck, boyo.

☒ VIBRANIUM REINFORCEMENTS

-Dug out of Gentle's remains. Wasn't much else left of the mutie once the strikes on Krakoa were finished. Needed Vibranium to bind the weapon together—glad I didn't have to hike it to Wakanda to collect.

☐ MYSTERIUM

-Highly efficient radiation-proof conductivity. Properties no one on Earth or the stars above could completely figure out. Near impossible to find, but I know it's out there somewhere...and I will find it.
